T-628RE

WHEELED TROMMEL

The McCloskey 628RE Trommel Screener is suited for large heavy-duty applications. With a 6' diameter screen, the 628 Trommel generates a powerful screening action while the 28' long drum ensures longer time on the screen and the highest quality end product.

This trommel is likely to find applications where efficient and effective screening is essential for producing quality materials. Its heavy-duty design and large screening capacity make it a reliable choice for demanding operations. All McCloskey trommels undergo extensive field testing and are continuously improved through customer feedback.

McCloskey provides numerous custom drum and feeder options that are offered to meet each customer's unique requirements.
